The Active Layer tool is a powerful and often-secret weapon that enables you to work on any layer of your image without contaminating others. You can easily combine layers to create complex composites that can be easily edited and combined with other layers. The Lasso tool enables you to select an area of any size on your image and quickly mask or "frame" it out, which is perfect for making backgrounds, cutting out unwanted elements from an image, and creating selections for special effects like creating simple shapes like boxes and circles. The Pen tool lets you edit solid, closed shapes on an image with a pinpoint accuracy. The Spot Healing Brush tool is a remarkably effective way to remove minor blemishes from your image. Simply press your Spot Healing Brush tool and then move it over the area you want to heal. The Pen tool, when used with Pathfinder, creates a chain of linked, continuous paths that can be used as a path that you can move around, zoom in and out on, rotate, and scale with simple keyboard shortcuts. e3d0a04c9c
